

## MAAG Material Tracking system

### Minutes of Meeting

18 –November- 2024 | **Project Follow Up**

**Participants:** [Dey Sourav](#), [Ranjitha TS](#).

#### Topics Discussed: -

- **Changes Required for the Following Pages :**

- 1. Project Search Page:**

- Rename Project Current Location to Production Status.
- Add a new field: Order Status, with data pulled from the CSISyteline Schedule table.

- 2. Maag Search Page:**

- Rename Project Current Location to Production Status.
- Add a new field: Order Status, with data pulled from the Schedule table.

- 3. Project Status Page:**

- Rename Status to Order Status.
- Add a new column: Production Status, This data should be pulled from the Schedule table.

- 4. Project Missing Parts Page:**

- Fix scrolling issues so that all parts are scrollable.
- Modify the scrolling behaviour: Keep the header and footer visible while the body of the page scrolls.

- 5. Project Detailed Page:**

- Rename the Status Bar to Project Completion Status.
- Display the completion percentage next to the Project Completion Status.

#### **Changes Need Sheet Metals:**

- **Sheet Metals Section:** Change the name from Sheet Metals to Metals.

## 1. Received Metals Page:

Add a bellow fields to input Received Metal Details:

- a. **Material Number** (user input)
- b. **Material Description** (pulled from Syteline)
- c. **Heat Number** (user input)
- d. **Cert Number** (user input)
- e. **Country of Origin** (user input)
- f. **Quantity Received** (user input)
- g. **Unit Measure** (pulled from Syteline)

## 2. Project Metals Page:

- Allow users to enter a Project Number. Based on the Material Number, retrieve the Heat Number, Cert Number, Country of Origin, and Quantity Received from the Received Metals Page.
- Add a field for Quantity Used.

## 3. Under metal section add new page - Print/Export Metal: to Filter Data based on a date range and give an export to excel option.

## 4. Project Status - Print/Export:

- Add a new page under Project Status to Filter Data by Date Range, Customer Name, Order Status, and Production Status and give an export to excel option

## 5. WIP :

- Finalize page: Add a Print/Export button to export data to Excel for a specific project number.
- Print/Export to excel: Add a new page under WIP to Export All Moved Data to Excel. Include a filter to refine data based on a Date Range.
